## ANALYSIS

It is thought that the Maça region got its name from the people of Trabzon origin, who were settled in the region after the conquest of Istanbul.

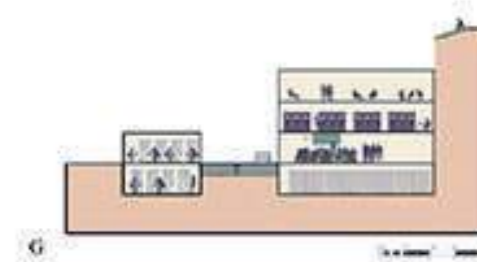

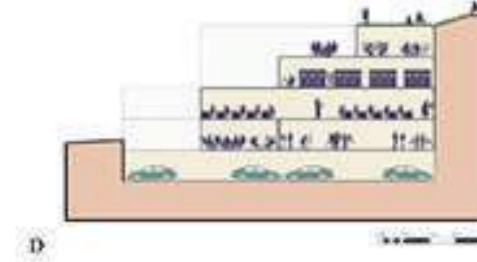

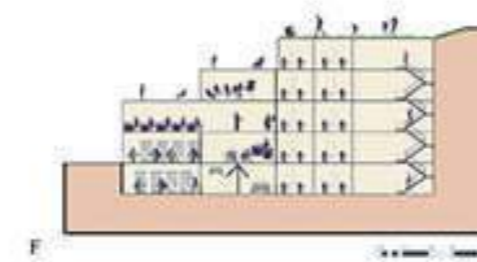

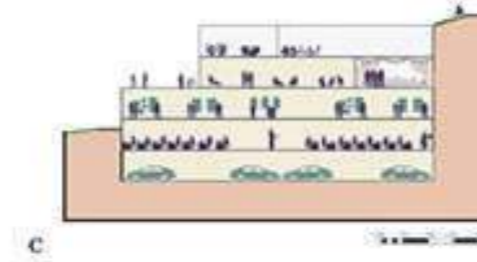

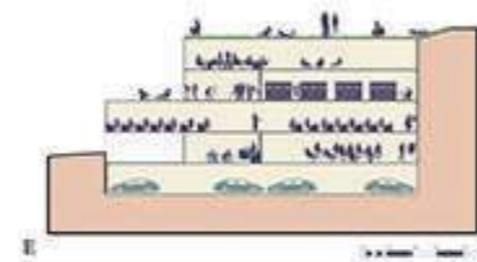

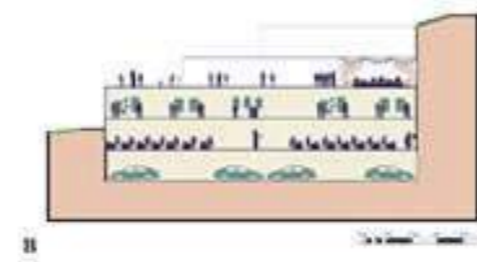

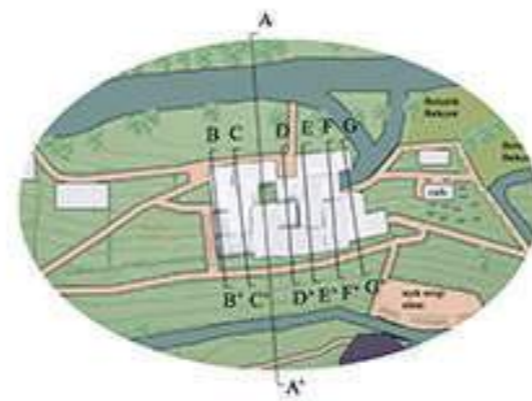

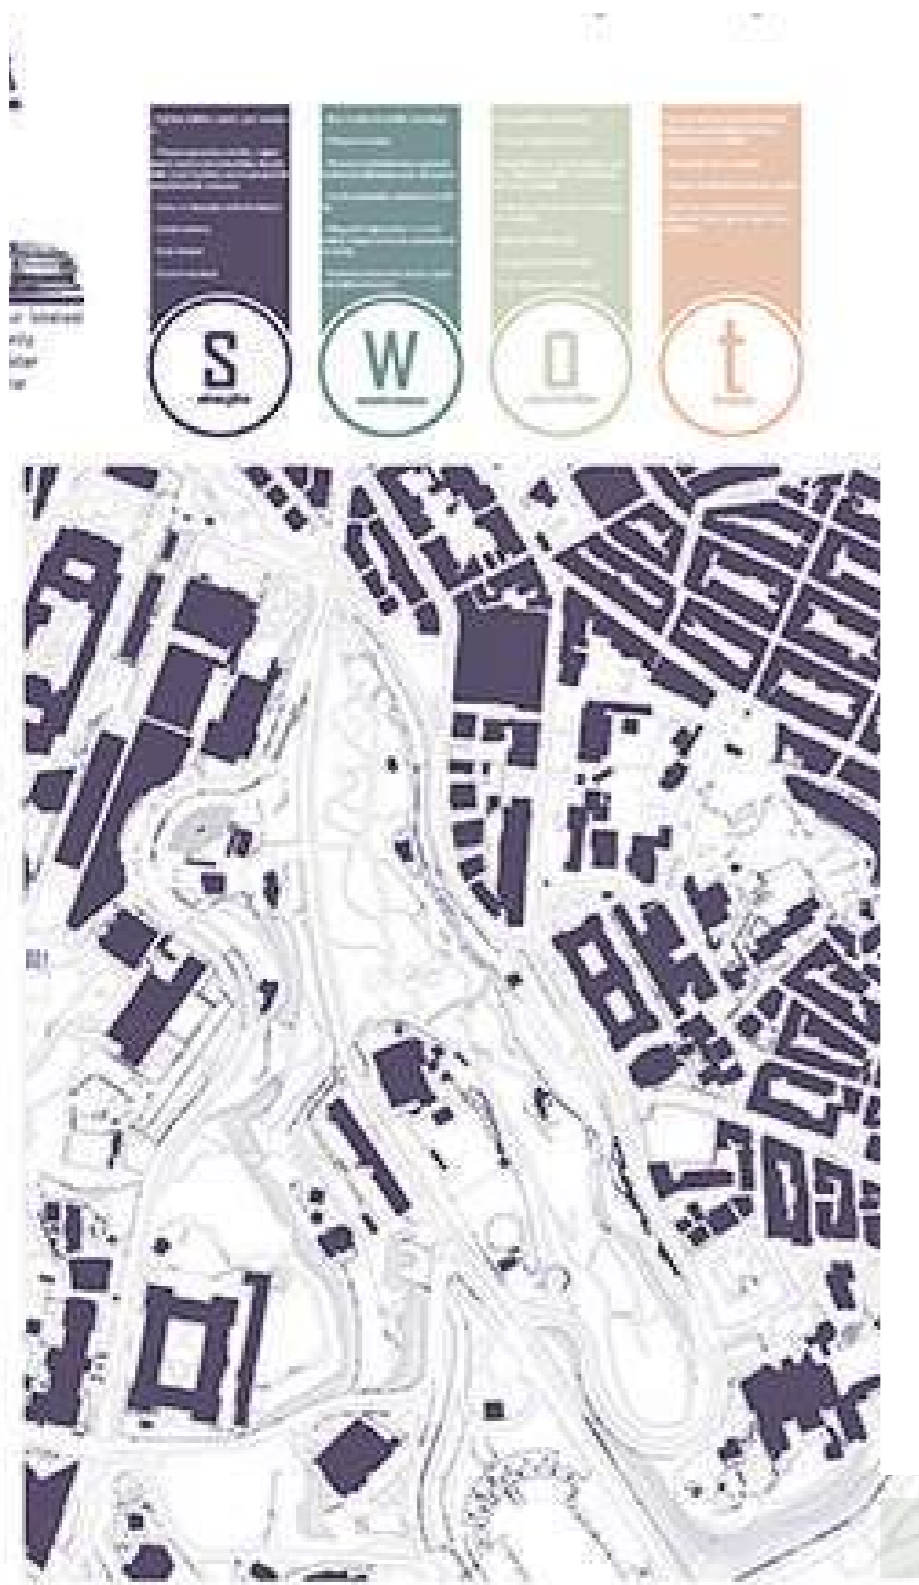

While Maça Park was a region that hosted the homeless in the early 70s, the huts of the homeless were demolished after a rehabilitation work and the perception of the park changed. Known as a love park in the 90s, the park was renamed "Maça Democracy Park" in 1993.

There are two sports equipment parks, two children's playgrounds, two coffee houses and restaurants, an artificial island and nine artificial pools inside the Maça Democracy Park.

Maça Democracy Park is one of the parks rich in vegetation. In addition to Linden, Poplar, Hornbeam, Chestnut, Oak, Acacia, Sycamore, Boxwood, Alder, Walnut and ash trees, there are hundreds of plants in the park.

## UTOPİA / beşiktaş dormitory project

21-22

The building is a dormitory, while I was designing it, I based it on the outer borders of the area and went to a square in the middle. I designed this area as a free space where the dormitory users can sit and have a drink against the scenery where they socialize. In my building blocks, I divided the western part into workshops and common areas. Thus, I opened it to the use of dormitory students and tried to create a solution for the missing workshop problems of the conservatory students near it. In the eastern and southern parts, I settled according to the landscape. I envisaged student rooms and areas such as the library and cafeteria where I envisage crowded use.
