

Miraç Ince

Industrial Designer

I graduated from Gazi University, Department of Industrial Design. I graduated in 2023 and started my profession to touch people's lives and add design to their lives. I have always worked by prioritizing people and design in my projects both at school and outside of school. I enjoy being a leader in projects and managing the process. I think I am very good at time management in projects. I would like to tell you about myself and my projects...
